

No Strain, Everything to Gain with Barbaric Wood Vacuum Panel Lifters

Since 1995, Barbaric has provided automation and storage processes that have yielded high profitability and rapid payback for wood manufacturers across Europe.

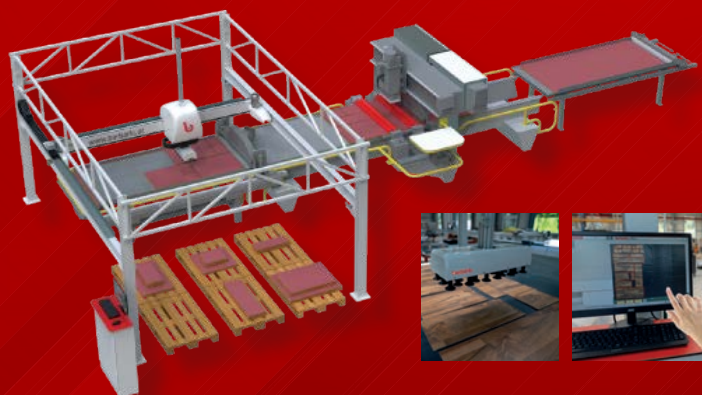

Barbaric's expansion into the North American market allows Taurus Craco Machinery the ability to provide innovative manufacturing and material handling technologies to our valued customers throughout Canada.

- Door Manipulators
- Area Storage
- Door Storage Systems
- Feed and Return Systems
- Wood and Glass Vacuum Lifters
- Panel and Buffer Storage Systems

Barbaric UWL3 Lifter

Parts handling from panel to packaging

Fully automatic unloading and stacking of finished CNC parts

NESTING PICKER NST

Unloading of parts after CNC-processing is often a strenuous and ineffective process when done by hand.

Our innovative Nesting Picker NST with its revolutionary camera based part detection system first detects the exact position of finished parts and then automatically unloads them onto pallets or onto conveyors for further processing.
